

Romance in the Wild

Learning Lecture

Nothing says love like a pebble, well, if you're an emperor penguin! Animals have evolved complex mating rituals that vary widely across species. They can appear cute, crazy, or cryptic to us but, remember, beauty is in the eye of the beholder.

Discover some of the animal kingdoms' creative courtship displays at February's Learning Lecture. Maybe you can find a novel way to celebrate Valentine's Day with your special someone!

Recommended for ages 13 and up.
