Earthworm Invasions in Upstate New York: Crawlers, Jumpers, & Castings, Oh My! *Learning Lecture*

New earthworms are crawling into the gardens and forests of New York. Tim McCay, Colgate University Professor of Biology and Environmental Studies, will acquaint us with these squiggly pests.

Though some introduced earthworms help garden plants, other species are not so beneficial. Dr. McCay will show us how to identify these creatures and what steps we can take to protect our green spaces.

*Program admission included in membership
Not-yet-members: \$5/individuals and \$14/families*
